Fiber Optics: Splicing, Terminating, Testing - Advanced Fiber Optics & Fiber Mgmt Systems
SONET/SDH - Gigabit Networks - VLANs & VPNs - Layer 3 Switching - Wireless - 802.11x and more...

"Great details on premise equipment, Customers vs C.O requirements and covering different standards."

Farmers Mutual Telephone Cooperative, Derek Franker

"BTS has helped the ITA fulfill its goal of providing state-of-the-art Hands-On Technical Training for our members on a variety of subjects (T1, DSL, Fiber Optics, Fault Locating, OSP Testing, Data Networking) without any administrative or scheduling hassles."

Illinois Telecommunications Association President, Doug Dougherty

"Improved my knowledge in troubleshooting and I learned how these applications worked."

Citizens Mutual Telephone Co., Deano Sargent

"Hands on labs were great! Instructor had outstanding knowledge and stayed focused."

Griswold Coop, Carl Lance

"I was shocked at the amount of equipment we were able to use in the labs, what a difference alarms and errors mean."

Northwest Tele Cooperative Assoc., Duane Barth

"The hands on application. Testing and finding the troubles in the labs, gave me the idea of what actual trouble would look like in the field."

Clear Lake Independent Telephone Company, Dennis Fitzgerald

"This was the best practical hands on training I have been to, I liked the smaller class size, great job."

OmniTel Communications, Josh Eckert

"The hands training with all the equipment was great."

Heart of Iowa Communications, Mike Leslie

"Course manual was better than the manual that comes with our test equipment"

IAMO Telephone, Bob Smith

BTS is non-vendor specific. Providing just training, not a product sales scope.

BTS can customize training toward specific equipment, application requirements and testing/troubleshooting scenarios in a live classroom lab or an out-in-the-field setting.
