

Hands-On

Pole Climbing Re-Certification & Pole Top Rescue

including: CPR/First Aid Certification

Course Description

This 2-day course will have the participants review the safe methods of pole climbing previously learned. They will perform several exercises on the pole that would be used in day to day activities.

The course will also include Pole Top Rescue, the method to safely and effectively retrieve an injured worker from a pole. Not only will they learn how retrieve an injured worker but be able to administer first aid once on the ground.

Upon completion of the course attendees will be Certified in CPR and Basic First Aid. Plus they will have been Recertified in Pole Climbing with up to date revisions and standards, trained in Pole Top Rescue and will be more confidence in their climbing ability and be able to perform work functions more efficiently.

Attendees will also review safe ladder handling practices. This will include the proper techniques of carrying and positioning the ladder, securing the ladder to the pole and mid-span setup.

All SAFETY practices will be covered and must be followed during the training exercise.

Note This course is physically demanding. Students must earn at least 70 of the competency points to become certified in this course.

Students Will Learn

- **New Revisions and Standards**
- **Safely and Effectively Ascend and Descend Wooden Poles**
