#### **Course Outline**

#### **Module I: CS 1500 Documentation**

Description and Use Features and Services Input/Output Data Modification

#### Module 2: CS 1500 Input/Output

Terminal Access (Serial and Telnet)
Logging in
Resident Command
Operations, Administration, Maintenance, and Provisioning (OAMP) Commands
Graphical User Interface (GUI)

#### Module 3: CS 1500 Features

Residential Services Business Services VoIP Features

#### **Module 4: Configuring Subscriber Lines**

Time Division Multiplexing (TDM) Session Initiation Protocol (SIP) Media Gateway Control Protocol (MGCP) Hunt Groups

## Notes

The equipment listed below, would be required for an extensive Hands-On Experience

- Access to CS 1500, both private OAMP network and Public VoIP network
- The CS 1500 office should already be configured to support VoIP  $\,$
- Computers for students with network access
- Working phones (TDM and VoIP) for programming purposes
- Laptop Projector
- White board

## **Delivery Method**

Instructor led with Hands-On exercises.

# **Equipment Requirements**

(This apply's to our hands-on courses only)

BTS always provides equipment to have a very successful Hands-On course. BTS also encourages all attendees to bring their own equipment to the course. This will provide attendees the opportunity to incorporate their own gear into the labs and gain valuable training using their specific equipment.

# **Course Length**

3 Days
