Hands-On
GTD-5 Line and Trunk (Database)

Course Description

Learn about the GTD-5's nomenclature and how to add, change and delete directory numbers, basic digit collection and translation, and how switch-based features including CLASS features are assigned (line administration). Also learn the basics about intra- and inter-switch trunk group translations, SS7 and Equal Access databases (trunk administration).

Finally, students also learn about digit translation which shows how to set-up screening, announcements, billing parameters, office timing values, etc. As required, some overview on administering lines to survivable remotes like the RSU or a GR-303 remote, or how to program BRI lines can also be provided in this course. An introduction to the GTD5IO command input software is shown if needed.

Notes

This course requires access to customer GTD-5 Switch or Switches for Non-Intrusive training.

Delivery Method

Instructor-Led with numerous labs and exercises.

Equipment Requirements
(This apply's to our hands-on courses only)

This course requires access to customer GTD-5 Switch or Switches for Non-Intrusive training.

BTS always provides equipment to have a very successful Hands-On course. BTS also encourages all attendees to bring their own equipment to the course. This will provide attendees the opportunity to incorporate their own gear into the labs and gain valuable training using their specific equipment.
