

Hands-On

Commercial Driver License (CDL) Test Prep

Written and Driver Skills Test-Prep

Course Description

BTS Training offers an extensive On-Site (CDL) Commercial Driver License training Test-Preparation course which covers all pertinent information that typically appears on both the Hands-On and written CDL test. We work with you to tailor our course to meet your organizations specific commercial and truck driving needs while providing your employees with the knowledge to safely drive commercial trucks in accordance with state and federal regulations. Our CDL prep test and training course is the most effective way for your employees to learn the material necessary for passing their CDL exams.

At BTS Training, our CDL Instructors have Real-World Experienced and are the best in the industry.

Our effective Hands-On approach will help prepare employees for taking both their Written and Driving Skills Tests to obtain their CDL. We bring our training course to your site, saving you time and travel expenses. In addition, our On-Site CDL prep test can be customized to meet your organizations specific equipment needs and your states requirements.

When preparing for a Commercial Drivers License (CDL), simply reading through the CDLs drivers manual or depending on your driving experience alone will not provide you with the necessary information and skills to pass the various CDL tests and licensing. Further training should be obtained in order to pass the CDL Written and Driving Skill Tests.

THE PROCESS OF OBTAINING A COMMERCIAL DRIVERS LICENSE

Similar to getting a regular driver license, those looking to obtain a CDL must first get a permit by passing a series of written exams. While specific requirements vary from state to state, most states' CDL permit testing covers General Knowledge, Air Brakes, and Combination vehicles. For drivers in need of certain endorsements such as Hazardous Materials (HazMat), additional written CDL endorsements exams are needed. Finally, drivers must pass the CDL driving test, which is a 3-part exam that includes pre-trip inspection test, basic control skill test, and a driving test. Once all three skills are passed, the driver can be issued a CDL.

BTS Looks forward to having your employees prepared to pass their exams and obtain their CDL and get out on the road.

Students Will Learn

- Paperwork needed to obtain your CDL, including medical requirements
- Endorsements
- General knowledge (required)
- Air brake (required)
- Hazmat (optional)
- Combination vehicle (optional)

- What happens at a roadside inspection with dos and donts if you are stopped
- Proper cargo loading and shipping procedures
- A replica of a DMV Test Course will be used for Hands-On practice
- Over the road practice done one-on-one with the Trainer
- And more...

Target Audience

Anyone looking to obtain their Commercial Drivers License (CDL).

Prerequisites

Requirements for Obtaining Your CDL License, all of which may vary by state

-Existing driver's license. (Drivers must hold a valid, non-commercial driver's license to obtain a CDL license.)

-Age requirement. Drivers must be 18 years or older to acquire a CDL license and 21 years or older to drive across state lines or haul hazardous materials.

-Driving record. (Drivers must have one to two years of driving experience before acquiring their CDL licenses. (Their driving records must not include suspensions like acquiring driving points, traffic violations, DUIs/DWIs, failing to appear in court, or failing to pay child support. If drivers are suspended, they must refrain from driving for a designated time period, complete a defensive driving course, and comply with reinstatement fees.)

-No criminal record. (Drivers must be able to pass background tests.)

-Proof of citizenship. (Drivers must be able to prove their citizenship with a social security card or birth certificate.)

-English comprehension. (Drivers must be able to read and speak English.)

-Physical and medical standards. (Drivers must have a valid Medical Examiners Certificate, which acknowledges acceptable vision and health conditions.)

Delivery Method

Instructor-Led with Hands-On and Written exercises throughout the training.

Equipment Requirements

(This apply's to our hands-on courses only)

Customer must provide the necessary equipment needed to teach the Hands-On aspects of this training.

BTS always provides equipment to have a very successful Hands-On course. BTS also encourages all attendees to bring their own equipment to the course. This will provide attendees the opportunity to incorporate their own gear into the labs and gain valuable training using their specific equipment.

Course Length
