Hands-On Automotive Wiring Harness For Electric Vehicles (EV)

Course Description

This Hands-On course contains practical Steps and Procedures in Performing Electrical Diagnostics and Repairs on Electric (EV) Vehicles, it contains only the right and recommended methods for Electrical Testing and Repairs.

It contains step-by-step procedures on the use of Test lights and multimeters for testing all kinds of Fuses, Relays, Connectors, Sensors and Actuators. It also covers understanding Wiring diagrams and color code. It helps to avoid wrong and unsafe Testing methods, it helps avoid bypassing and bridging in Automotive Electrical works.

Its a practical Hands-On course with relevant theories, it avoids mathematics and physics that are not needed for Repair. It can be used by everyone.
